I am an enthusiastic full-stack developer with a proven ability to design, develop, and deploy complex web applications. I leverage my proficiency in both front-end (HTML, CSS, JavaScript) and back-end technologies (Python , MySQL, Git, etc..) to bridge the gap between user experience and server-side functionality. I thrive in collaborative environments and possess a strong problem-solving mindset, allowing me to deliver innovative solutions with a focus on efficiency and scalability.

Education

Major in Information Technology   2021–2025BATCH
8.28/10CGPA(UPTO5TH SEMESTER)
Hindusthan Institute of Technology–Coimbatore,India

Passed Higher Secondary with 80.5%   MAY-2021
Muncipal Girls Higher Secondary School–Thiruvannamalai,India

Passed SSLC with 74.5%   MAY-2019
Bhagavan Higher Secondary School-Thiruvannamalai,India

Key Skills

- Demonstrated competency in web development technologies:

  - HTML5.
  - CSS3.
  - JavaScript.
  - React.js.
  - Python
  - MySQL
  - Git& GitHub.
  - MS Excel

- Excellent written and oral communication skills in English, effective collaboration.

Certification

- Programming Foundation in python from NXT wave
- Software Testing Tutorial from Great Learning
- Design Thinking for Beginners from Simple Learn and Coursera
- Binary Trees from Great Learning
- Data Structures in C from Great Learning.

Languages Known

- Tamil
- English
- Telugu

Projects

Credit Card Fraud Detection-Machine Learning

Algorithm: Hidden Markov Model

Code: Python

Proficient in implementing cutting-edge techniques for credit card fraud detection, my project showcases the application of Hidden Markov Models (HMMs) to identify fraudulent transactions with high accuracy. Through meticulous analysis and model development, I have contributed to enhancing security measures and minimizing financial risks for businesses.
